

2026 MOPM多學學及精準醫學聯合會議 海報投稿通過名單

Society	No.	Presenter's Chinese Name	Presenter's English Name	Abstract Title
台灣生醫 (TBSB)	TPS-001	何晉	Jung, PAO	Protein-Wide Identification of Sphingosine-1-Phosphate-Binding Proteins Using a Liposome-Proteome Microarray Platform
	TPS-002	何佳都	Jia-Jun, He	antiTCAR Inhibits Antigen Presentation and Downregulates MHC class II in Pancreatic Ductal Adenocarcinoma
	TPS-003	吳元傑	Yuan-Jie Wu	High-Throughput Protein Analysis Cell Lyse via Protein G Oriented Antibody Microarray
	TPS-004	李永順	Yung-Kuo Lee	Nuclear Co-localization of Gelsolin-3 and OCT4 Defines a Niche-associated Stemness State in Colorectal Cancer
	TPS-005	陳傳國全	NGUYEN TRAN QUOC TOAN	Protein Antibody Signatures in Autoimmune Inuits Using Escherichia coli Proteome Microarrays
	TPS-006	周廷雄	Ting-Chen Chou	Material Design and Capture Performance of a Water-Soluble Adipocyte-Capturing Kit Formulated as a Model Analyte
	TPS-007	徐祥芝	Hsiang, Chih, Hsu	Development of a 384-Well-Base Quantitative Proteomic Strategy for the Analysis of Glioblastoma Tissues
	TPS-008	段令毅	Ling-Yi Jhu	An Optimized High-Throughput Screen Proteomic Workflow for Deep Profiling and Clinical Phenotyping of COVID
	TPS-009	馬添敏	Cheng-Yi Ma	Single-Molecule Screen Proteomics Reveals Nutritional State-Dependent Protein Dynamics Following High-Intensity Interval Training
	TPS-010	龐山	Son Hoang	Identification of Cross-Reactive Human Proteins Elicited by SARS-CoV-2 Vaccine-Induced Antibodies
	TPS-011	張正瑜	Chih-Yu Chang	Proteomic Profiling Identifies Molecular Signatures Associated with Biological Heterogeneity in Gestational Diabetes Mellitus
	TPS-012	張俊毅	Chong Jun Yi	Multi-Omic Profiling of Colorectal Cancer Reveals Distinct Tumor Features across Consensus Molecular Subtype Phenotypes
	TPS-013	張凱富	Kai-Fu Chang	Prognosis-Related Molecular Heterogeneity Predicts Prognosis and Immune Microenvironment Remodeling in Colon Adenocarcinoma
	TPS-014	黃鎮宇	Ching-Yu Mo	Functional Regulation of mTOR through Binding of Intracellular Lipopolysaccharide
	TPS-015	許博凱	Bo-Kai Hsu	Comprehensive Virosome Profiling of Hony by HS-SPME/GC-MS for Batch-to-Batch and Geographic Origin Differentiation
	TPS-016	陳治雄	Chin-Huei Chen	Quantitative Proteomics Unveils Mitochondria A-Mediated Mitochondrial Dysfunction and Oxidative Stress in Ovarian Cancer Cells
	TPS-017	陳佳致	Chia-Wen, Chen	HS-SPME-GC/MS-based analytical platform for plasma metabolite profiling in antipsychiatric syndrome
	TPS-018	陳楠英	Chen YuZhen	Repositioning Bazedoxifene, a Selective Estrogen Receptor Modulator for Clear Cell Renal Cell Carcinoma through Phosphoproteomic Profiling
	TPS-019	卓安琪	Olivia Tsoa	Investigating The Oncogenic Role of RRM2 in Pancreatic Ductal Adenocarcinoma (PDAC)
	TPS-020	彭冠傑	Peng Kuan Chieh	Spatial Optimization of Cell-Donor Pairing via Monomer-Styreneolipid Interactions for Enhanced Homology-Directed Repair
	TPS-021	傅佳樂	Jia-Yi Yang	Establishment of a Scalable Flow Proteome Microarray Platform for Profiling Distal-Associated Antibody Signatures in Schizophrenia Spectrum Disorders
	TPS-022	張奕宏	Yu-An, Liao	Mitochondria-Derived Reorganization of Tumor Inhibits Mitochondrial Networks for Early Detection in Colorectal Cancer
	TPS-023	陳維璋	Chien-Wei Heung	Carbon-Esterolizable Vesicle Proteomics Identifies Mitochondrial and Connective Dysfunction in Carbon Monoxide Poisoning and Their Reversal by Hyperbaric Oxygen Therapy
	TPS-024	謝子真	Tzu-Chi Liu	Deciphering the Protein Targets of Amyloid-beta with Escherichia coli Proteome Microarrays
	TPS-025	謝麗庭	Ssu-Chen Liu	Identification of Protein Mechanisms of Aging-Related Muscle-Induced Mitochondrial Aging
	TPS-026	蘇淳伊	Chun-Yi Tsai	Identification of A Candidate Cytosine Associated with B16-MSC Mediated Mitochondrial Reprogramming in Lung Cancer
	TPS-027	蕭麗瑩	Al-Li Hsiao	Functional Characterization of CDK18 in Clear Cell Renal Cell Carcinoma Progression
	TPS-028	蕭聖明	Sheng-Ming Chueh	Tracing Adipocyte Transfer by IL1AC Proteomics Identifies Adipocyte-Derived Drivers of Colorectal Cancer Progression
	TPS-029	羅以筑	Yi-Jwu Lo	Immunoproteomic Remodeling of the Tumor Microenvironment by GP130-PL1 Receptor Co-agonism in Colorectal Cancer
	TPS-030	Alia	Alia	Evaluation of an Optimized Reductive Amination-Based Ultra-High-Performance Liquid Chromatography Coupled with Tandem Mass Spectrometry (UPLC-MS/MS) Method for the Quantification of Arginine, ADMA, SDMA, Citrulline, and Oxidized
	TPS-031	Dahlak Daniel Solomon	Dahlak Daniel Solomon	Integrative Bulk, Single-Cell, and Spatial Transcriptomics Reveals an OGDSS-High Stress-Adapted Malignant State in Glioblastoma
	TPS-032	Hana Natasha Christiadi	Hana Natasha Christiadi	Quantitation of Primary Biogenic Amines (Histamine, Tyramine, Putrescine, and Cadaverine) in Fermented Beverages via Isotopic Formylation/Reductive Amination and LC-MS/MS
	TPS-033	Neethu Palekkode	Neethu Palekkode	Integrative Analysis Reveals Lysosomal Acid Phosphatase 2 as a Biomarker of Glucose Progression and Immune Remodeling
	TPS-034	Sachin Kumar	Sachin Kumar	Multi-Omic Profiling Reveals L-Glutamine Transporter-Associated Metabolic Adaptation and Tumor-induced Resistance in Glioblastoma
	TPS-035	Samantha Christy Lie	Samantha Christy Lie	Development and Validation of a Reductive Amination LC-MS/MS Method for the Simultaneous Determination of 5-Adenosinephosphorylcholine (5AP), Homocysteine, and Methionine as Biomarkers Associated with Cardiovascular Disease
	TPS-036	李麗香	Li-Rong Li	Verification of Serological Lung Adenocarcinoma Protein Markers Using Liquid Chromatography-Multiple Reaction Monitoring Mass Spectrometry
	TPS-037	林俊聰	Chun-Chi Lin	Discovery of Chemical Markers in Spotted Eggs Using Mass Spectrometry-Based Untargeted Metabolomics
	TPS-038	林楠芯	Yu-Hsin Lin	Comprehensive Profiling of Human Hair Metabolome Using Mass Spectrometry
	TPS-039	林聰軒	YuXuan, Lin	Hair Exposure Patterns Associated with Alzheimer's Disease-Related Neurocognitive Disorder Using High-Resolution Mass Spectrometry-based Untargeted Approaches
	TPS-040	張志輝	Chih-Wei Chang	Characterization of the Human Hair Metabolome for Long-Term Chemical Exposure Monitoring Using High-Resolution Mass Spectrometry-Based Suspect Screening
	TPS-041	張耀銘	Min-Wu Zhuang	Comprehensive Profiling of Human Urinary Metabolic Acid Compounds Associated with Exposure to Reactive Chemical Species Using Extrinsic Oxidation and High-Resolution Mass Spectrometry
	TPS-042	陳華宇	Pao-Yu Chen	Discovery of Chemical Markers for Fish Poisoning Using Storage Using Mass Spectrometry-Based Untargeted Metabolomics Analysis
	TPS-043	鄭心婷	MIN-YU JIN	Investigation of Protein-Mediated Interactions in Atrial Fibrillation of Atrial Fibrillation Diseases Using Mass Spectrometry
	TPS-044	張東東	DONG-CHEN TSAI	Discovery of Chemical Compounds Changes in Brain Cells Potentially Associated with Neurodegenerative Mass Spectrometry-Based Metabolomics
台灣生醫 (TBSB)	TBSB-001	王維鈞	Pei-Yun Wang	Integrative Transcriptome RNA and ATAC Profiling Unveils Nuclear NDRG2 as a Regulator in Mitochondrial Energetic Compensation of DNA Repair Processes Upon Radiation Exposure
	TBSB-002	江皓宇	Chiang Hao-Yu	Evaluating Spatial Pattern Preservation in Histology-Based Gene Expression Prediction for Breast Cancer
	TBSB-003	吳秉華	Bing-Rong Wu	Modeling Protein Modification States for Integrating Posttranslational Modification Crosslink Prediction
	TBSB-004	李文凱	WenKai Lee	NETS Network Topology-based Single-Sample Gene Set Scoring
	TBSB-005	曹廷漢	Ting-Wei Tsao	An Interactive Multi-Cell Platform Integrating Genetic, Phenomic, and GWAS Data to Accelerate Marker Discovery for Breeding
	TBSB-006	陳祐謙	Chen Chi Liang	Deviation from a Healthy Multi-Omic Network Discriminates Cognitive Impairment in Older Adults: A Normative Graph Autoencoder Approach
	TBSB-007	陳宏潔	Hsin-Wei Chen	Inferring Small Extracellular Vesicle-Mediated Cell-Cell Communication from Spatial Transcriptomics with Graph Transformers
	TBSB-008	陳耀彰	Dan-Yi Chen	KLyMstar: An Explainable Multi-label Framework for Eight-Lane PTM Types
	TBSB-009	黃宇嘉	Ting-Jia Huang	Gene Panel Selection Generates the Total RNA Contribution to Histology-Based Spatial Expression Prediction in Colorectal Cancer
	TBSB-010	段友勝	Yu Sheng Paik	Pan-Cancer Spatial Transcriptomics Study Reveals Tumor Microenvironment Signatures Associated with Immunotherapy Response
	TBSB-011	蘇添香	Cheng-Ruei Tsai	CardioBeach: An Automated Software Tool for ECG Denoising and Feature Extraction
	TBSB-012	蘇佳維	Jia-Jin Tsai	MSQC: Quantitative Molecular Features Comparison of Chemosensitivity against Gene Lists
	TBSB-013	蘇宗英	Zong-Yun Tsai	Integrated Analysis of Gut-TMA Microbial Remodeling and Host Metabolic Responses During Cargazifluon Treatment
	TBSB-014	蘇正達	Chih-Lin Tsai	Deciphering Molecular Mechanisms of Jing-Wu Formula and Tung-Yi Formula in Depressive and Bipolar Disorders through Network Pharmacology
	TBSB-015	陳秉承	Wei-Cheng Lai	Detection of Mutations from Tumor-Only Whole Exome Sequencing Data
	TBSB-016	謝謙益	Chih-Hung Hsieh	Characterizing Altered Polyadenylation Sites and Their Impact on Post-Transcriptional Regulation Across the Four Molecular Subtypes of Melanoblastoma
	TBSB-017	陳秉祥	Pei-Yen Chung	Deep Learning for Mitochondrial Carbon Separation in Gene-Based Compound Transcriptomics Using Unsupervised Defined Regions of Interest
	TBSB-018	蘇軒軒	SU, HSUAN KUANG	Cross-Region Evaluation of Intra-Spatial Transcriptomics for Clinical Response Prediction in Glioblastoma across
台灣生醫 (TBSB)	TGMB-001	林正偉	CHYI-MAO	Exposure and localization Analysis of Human TAME in Colorectal Cancer Tissues
	TGMB-002	王宇宣	Chien-Yi Wang	SLIT-1 Inhibition Sensitizes Hepatocellular Carcinoma Cells to Spheredness
	TGMB-003	王韻婷	Yu-Han Wang	YAP1-207B Promotes Chemoresistance Resistance through Lipid Accumulation in Colorectal Cancer
	TGMB-004	王麗婷	Wang Yi-Ting	Developing an Efficient Anticancer Drug Screening Platform through Membrane-Targeted Protein Expression System
	TGMB-005	吳翰鴻	Yuh-Han Wu	Overexpression of 287B10 Leads to the Development of Gastric-Related Prostate Cancer
	TGMB-006	宋南宸	Yu-Jui Sung	Maintaining osteoblast's impact on EGF-R colorectal cancer through ligand-extracellular vesicles
	TGMB-007	宋麗芬	Ranginee Songthim	A targeted long-read sequencing approach for accurate determination of copy number in the neural nuclear region T2 genes
	TGMB-008	李冠傑	Kuan Ting Li	Chemically-Combined Genetic Architecture of Metabolic Syndrome: Causal Inference And Risk Prediction for Type 2 Diabetes
	TGMB-009	沈傑	Chieh Shen	Deciphering Fibroblast Plasticity in PDAC: A Single-Cell and Spatial Landscape of the S-19Cytosolic Axis
	TGMB-010	林鈺恩	Chin-En Lin	PL3 Modulates Epigenetic Silencing of NK/G2D Ligands to Enhance NK Cell Responses in Urothelial Carcinoma
	TGMB-011	林俊庭	Lin, Yi-Jing	ScRNAseq Analysis of Extracellular Matrix and M2-like Macrophage Signatures in Relation to Anti-PD-1 Response in Melanoma
	TGMB-012	林德宣	Yi-Syuan Lin	A Regional Positive Feedback Loop Between RP11-73A2.1.3 and YAP1 Regulates C-Carboxyl Expression in Colon Cancer
	TGMB-013	段廣惠	Guang-Huei Chiou	Genome-Wide Association Study of Androgen Deprivation Therapy Response and Survival in Patients with Metastatic Prostate Cancer
	TGMB-014	范若鴻	FAN,JO-HAN	Engineered Anti-EpA2 Extracellular Vesicles as Tumor-targeted Nanocarriers to Improve Oxidative Delivery in Pancreatic Cancer
	TGMB-015	張在鑫	Zai-Yao Chang	Tumor-selective Activation of PPI-galactoside Enhances Anticancer Efficacy and Reduces Systemic Toxicity
	TGMB-016	張慕申	Mu-Shen Chang	A Prostate Responsive CAR-T Platform for Solid CD19-Targeted Immunotherapy
	TGMB-017	張宇彤	Yu-Tung Chen	Tumor-associated protein-activated anti-CD47 antibody potently maintains phagocytic ability of macrophages with minimal effect on healthy tissue
	TGMB-018	陳宇辰	Hsin-Yi Chen	Genomic Exonome-LONG as a Noninvasive Biomarker for Predicting Systemic Relapse Rates in Non-Ovarian Adenocarcinoma
	TGMB-019	陳宇辰	Yu-Chen Chen	Development of Protein-Activated Receptor (PAR) Variants: Antibodies to Reduce Toxicity with Minimal Binding Risk
	TGMB-020	陳宇宇	Hung-Yu Chen	Probing the Mechanisms of Potential Distal Metastasis and Bone Cell Enzymes on Collagen Production in Human Dental Pulp Fibroblasts
	TGMB-021	陳宇明	Tsung-Ming Chen	EGFR-related cellular stress through MET/EGFR as a potential anticancer progression
	TGMB-022	曾名赫	Ming-Chieh Tseng	Transcriptional Regulation of POU5F1 by ERF1.3 and Its Association with Cell Proliferation in MYC-Amplified M9-32 Neuroblastoma Cells
	TGMB-023	黃詩媛	huang yun lie	AMP-Responsive Pro-Inflammatory for Conditional Activation and Enhanced Antigen Presentation in Melanoma
	TGMB-024	黃宜禧	Yu-Chen, Yeh	Identification of Ubiquitin-Conjugating Enzyme E2C (UBE2C) as a Prognostic Biomarker and Functional Driver in Cholangiocarcinoma
	TGMB-025	蕭柏均	Po-Chun Liu	Analyzing the progress of accessible serrated lesions and exploring the mechanisms of their carcinogenesis process using machine learning and multi-omic studies
	TGMB-026	劉恩瑤	Liu En-Shuo	Prostate-activated Pro-CD3-CD20 antibody selectively unleashes T-cell cytotoxicity against B-cell lymphomas and improves safety
	TGMB-027	蘇亦涵	Yi-Han Tsai	Constructing canine anti-PD-L1 antibody to enhance the efficacy of treatment for canine melanoma
	TGMB-028	莊亞娟	Tsai Ya-chuan	NUT1B.1 Suppresses Primary Cilogenesis to Regulate Lipid Metabolism and Chemoresistance in Pancreatic Cancer
	TGMB-029	戴昱菁	Yu-Jing Tai	Autonomous VEGF-C Signaling Reorganizes Glutamine Metabolism to Maintain Cellular Redox Balance and Prevent Ferroptosis in PDAC
	TGMB-030	謝理彬	Li-Ge, Hsieh	A Mitophagy-derived Signatures Enables Prognostic Stratification and Identifies Novel Therapeutic Vulnerability in Acute Myeloid Leukemia
	TGMB-031	羅崇英	Tzu Yun Lo	Development of a Preimplantation Genetic Test for Falciparum Plasmodium: Muscular Dysphoria
	TGMB-032	鄭伊麗	I-Chen Cheng	Residential Sorting Signal Combined Recombinant Protein as a Therapeutic Protein Delivery Strategy to Bypass Blood Brain Barrier (BBB) and Enhance Target Selectivity for Glioblastoma Multiforme (GBM) Treatment
	TSECB-001	尤賴淮	Yu-Huai Yu	Predicting host-Protein Protein Interactions Using Stemness Hybrid CNN-Transformer Model and Transfer Learning
	TSECB-002	江偉立	Wye-Lup Kong	Profiling mouse embryonic leaf development and discovering new genes using high-resolution spatial long-read isoform sequencing
	TSECB-003	吳文娜	Wannarnop Uvivchai	Whole genome shotgun metagenomics pipeline validation and preliminary results for metagenomic characterization of gut microbiota in obesity-associated colorectal cancer
	TSECB-004	李祥宇	Li Shiang Yu	Development of an Integrated Analysis Platform for Cancer-Somatic Variants and Biomarkers Based on Next-Generation Sequencing Data
	TSECB-005	李祥宇	Lin-Yuei Lee	From protein-DNA complex structures to regulatory network interpretation: mapping structure-derived binding sites only optimally assembled positions in the human genome
	TSECB-006	林凱庭	Shao-Ling Lin	OrthoRank 2.0: An Integrated Multi-Omic Platform Advancing Distal Genomics and Evolutionary Science
	TSECB-007	張欣怡	Hsin-Yu Yuan	Positive Single-Strand Cleavage from RNA Velocity Defines Transcription Factor Stage-Specific Regulatory Programs
	TSECB-008	張鈞豪	JIAN-LIANG CHANG	A Label-Free Platform for Investigating Drug-Target Interactions in MEMOFLIT: Associated AME
	TSECB-009	陳雨彤	Yu Tung, Chen	Attention-based Synergistic Drug Combination Prediction via Multi-View Knowledge-Aware Graph Cross-Contrastive Learning and Gene Ontology-driven Cell Line Encoding
	TSECB-010	陳彥嘉	Yan-Jia Chen	Combination of an Integrated Panproteome and Transcriptome Analysis Platform for Deciphering Insights from 28 Species Comparative Genomics
	TSECB-011	陳景宏	YuCheng Chen	Molecular Memory Editors Foster An Integrated Platform for Pathogen-Human Molecular Memory Discovery
	TSECB-012	陳家宏	Jia-Syuan Chen	SynPathMap: A Multi-Scale Comparative Genomics Framework for Flexible Systemic Visualization, Quantitative Evolutionary Modeling, and Automated Pattern Recognition
	TSECB-013	曾得瑋	Te-Yen, Tseng	A Feature-to-Image Convolutional Neural Network Framework for Microbiome Classification and Cross-Dataset Prediction
	TSECB-014	黃庭琦	Ting-yun, Huang	A Deep Learning Pipeline for Automated Interpretation of MYC-FISH Images
	TSECB-015	黃敦祐	Dun-Kai Huang	Exploiting Antibiotic Resistance in Mycobacterium Intracellulare in Taiwan
	TSECB-016	黃麗園	NG SHANG-KOK	De novo/De novo: A Single-Cell Multi-Omic Framework for Systematically Discovering Hidden Regulation in Non-Differentially Expressed Genes
	TSECB-017	傅玉鋒	Yu-Feng Yang	AI-Predicted Spatial Drug Sensitivity from H&E Histopathology via Advanced Cross-Dataset Alignment of Cancer Pharmacogenomics and Spatial Transcriptomics in Colorectal Cancer
	TSECB-018	黃幸發	FENG LIN YE	Development of an Integrated Database Platform for Duck Genome Annotation, Functional Analysis, and Cross-Species Comparison
	TSECB-019	廖夢佳	Bin Hsin Liu	Development of a Multi-Omic Deep Learning Model to Predict Histone Modification Signals Across Developmental Stages in Drosophila melanogaster
	TSECB-020	蘇昕恆	Hsin-Wei, Tsai	Cross-Species Identification of Cell-Type-Specific Active Cis-Regulatory Modules via Deep Transfer Learning
	TSECB-021	龐榮恩	Ryan Rey M. Daga	Chromatin Contexts and Histone Modification Profiles Predict Evolutionary Conservation Across Gene Loci and Species
	TSECB-022	龐耀庭	Jui-Hung, Tai	Genomic Origin Tracing of SARS-CoV-2: Lessons from Taiwan's First Outbreak and Its Cryptic Transmission
	TSECB-023	龐梅玉	Angela Merici Giannetta Surya	Development of a Rapid Pathogen Identification Platform Integrating Real-Time Nucleic Acid Sequencing and Machine Learning-Based Analysis
台灣 (TBSB)	TSECB-024	龐文廷	Wen-Yu Chang	GEN Workbench: A lightweight, interactive Tool for Environmental DNA Analysis and Visualization
	TPMS-001	白灼必	Bao, Yun-Bi	From Phenotypic Data to Genetic Interpretation: A Case of Suspected MYH9-related Disorder in an Infant
	TPMS-002	呂家慧	Jia-Hui Liu	Association between Changes in Dysregulation Phenotypes and Genotoxicity DNA Methylation Profiles
	TPMS-003	呂家慧	Jia-Hui Liu	Multiple Infection-Associated Genetic Variants for New-onset episodes of bacterial infection across genetic groups
台灣 (TBSB)	TPMS-004	呂家慧	Jia-Hui Liu	Distribution of FMR1 Gene CGG Repeat Sizes in the Taiwanese Population Estimated by CGG Repeat Primed PCR
	TPMS-005	洪麗慧	Kuo-Sheng Hung	Uncovering Genetic Susceptibility Loci Associated with Anti-B Cell Antibody Levels in Taiwanese Patients with Primary Sjögren's Syndrome
	TPMS-006	段庭峰	Ting Chen-Liang	Predicting Next-Week Container Index from Routine Weekly Dargate Vector Surveillance Data in Kaohsiung, Taiwan
	TPMS-007	陳品均	Pin-Jun Chen	From Case Diagnosis to Gene Editing: Histone H3.9/PRP-Cas9 Therapies for Angelman Syndrome
台灣 (TBSB)	TPMS-008	陳麗寬	Chi-Kuan Chen	Lung Deep Phenomics Gene Screen (LDS): A Deep Array Selection-Based Platform for Precision Lung Cancer Risk Stratification
	TPMS-009	黃永琪	Huang, Yung-Chi	Multi-Omic Profiling Reveals Adipocyte-Tumor Crosstalk and Metabolic Reprogramming in uCRC Progression
	TPMS-010	陳瑋萱	Hsuan-Hsuan Wei	Tracing the Biochemical Path: A Personalized Approach to Primary Hyperparathyroidism in Pregnancy
	TSEV-001	高皓軒	Hao-Hsuan, Kao	Machine learning-guided blood exome proteomics defines a five-protein liquid biopsy score for T2DM complication stratification
台灣 (TBSB)	TSEV-002	張靜升	Ching-Hui, Chang	Integrated Blood Inflammatory Indices and Urinary Extracellular Vesicles for Risk Stratification in Upper Tract Urothelial Carcinoma
	TSEV-003	許禾臻	Ho-Chen Hsu	ECAP-Derived Extracellular Vesicles Promote Hair Growth in a Murine Model
	TSEV-004	黃品皓	Pin-Hao Huang	ADANCE: An automated LLM-integrated transcriptomics analysis platform with retrieval-augmented generation
	TSEV-005	黃品皓	Pin-Hao Huang	Machine learning-guided blood exome proteomics defines a five-protein deep biopsy score for T2DM complication stratification
	TSEV-006	黃宇瑄	Yu-Hsuan Yeh	The Functional Intrinsically Disordered Region in Synaptic SNAREs ESRF-1 Components to Promote Exosome-Mediated Bacterial Clearance
